

FatTail Membership Lifecycle

Every path from the Observer purchase — and what enforces each step

Observer

Activator

Navigator

Companion to Pricing Cards Plugin Specification v1.0 · 2026-09-26

Three tiers, three different jobs

Observer is a time-boxed on-ramp, Activator is the anchor, Navigator is the featured full membership

Observer

\$100 once · six weeks

- Everything Navigator gets, for six weeks
- Six-week training
- Complete it → lifetime tool access
- No monthly/annual toggle

Entry point

Activator

Monthly or annual

- Tools
- Discord access
- No coaching

Anchor — makes Navigator the obvious value

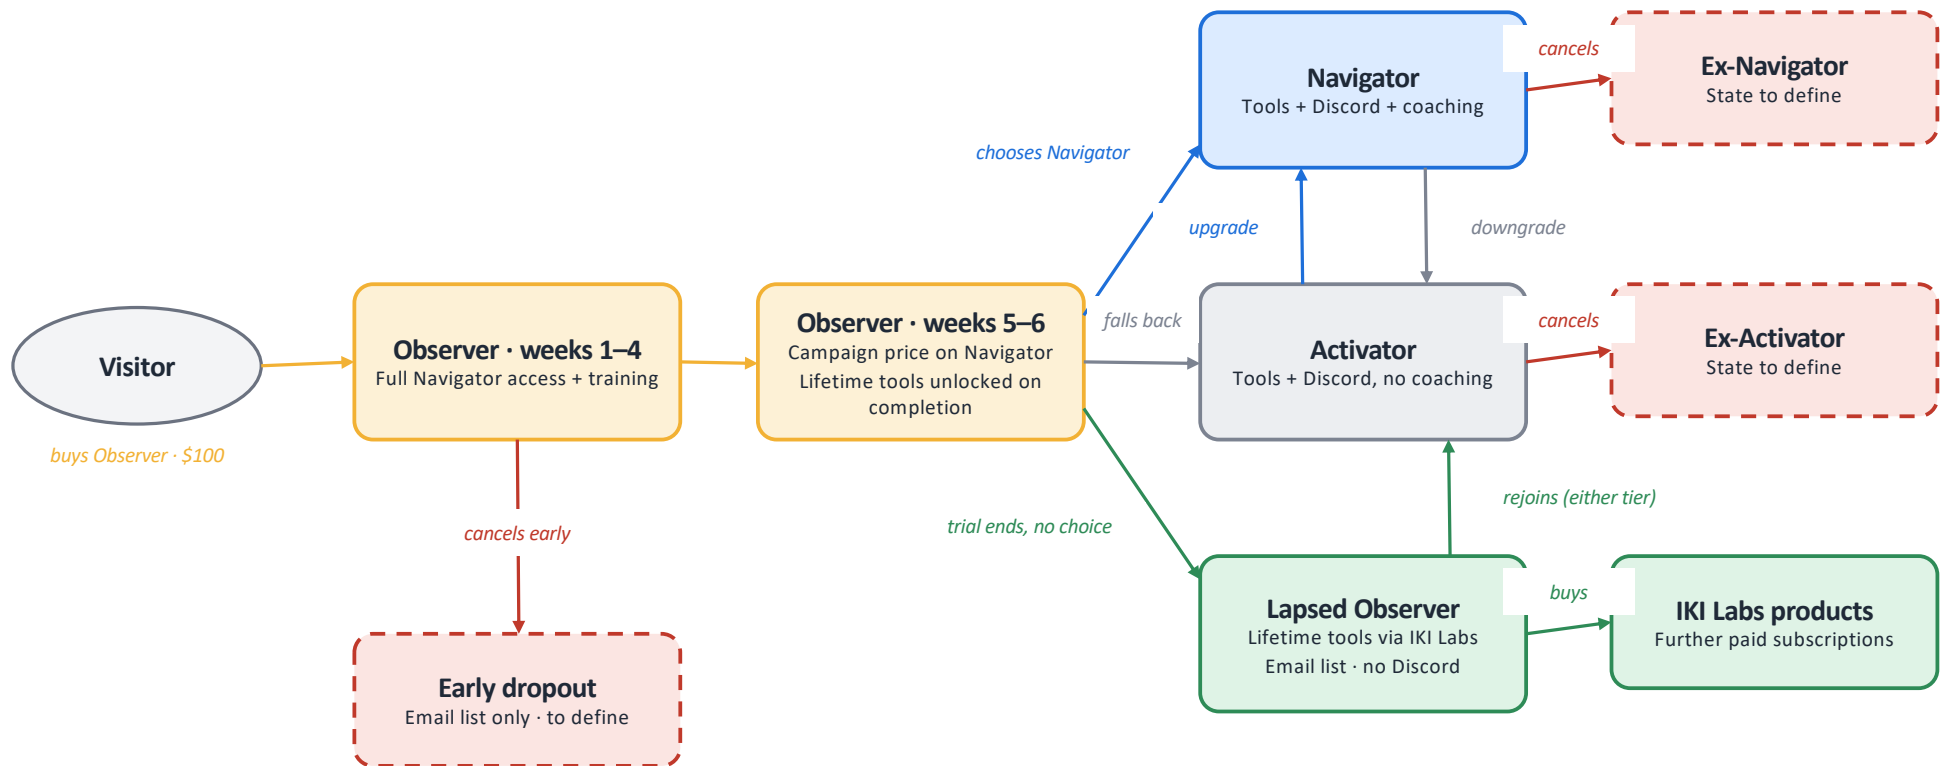

Navigator

Monthly or annual

- Tools
- Discord access
- Coaching

Featured card — the full membership

Member lifecycle — every path from Observer

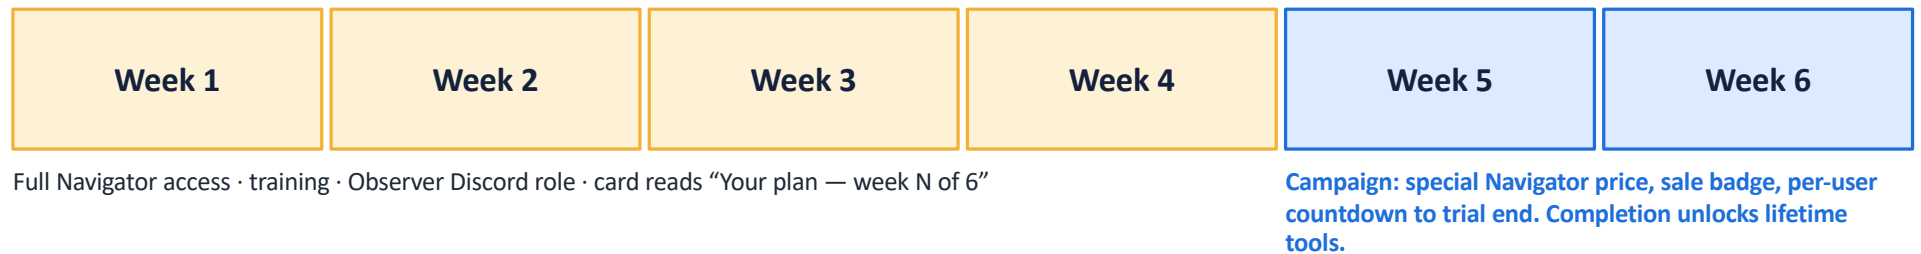

Source of truth: WooCommerce Subscriptions. WooCord mirrors every subscription change into a Discord role.

Inside the six weeks

What an Observer sees week by week, and where the campaign kicks in

Chooses Navigator

Subscription switches to Navigator. WooCord assigns the Navigator role. Card reads “Your plan”.

Falls back to Activator

Subscription switches to Activator. Coaching access drops; tools and Discord stay. Never promoted — the fallback after the Navigator pitch.

Makes no choice

Observer subscription ends. Keeps lifetime tools (IKI Labs) and stays on the email list. Loses Discord. Warmest possible audience for a later rejoin.

Nobody leaves empty-handed: the floor is tools plus the email list, forever.

What enforces each transition

WooCommerce changes the subscription, WooCord follows with the Discord role, the pricing cards simply reflect the new state

Transition	WooCommerce	WooCord (Discord)	Pricing cards show
Visitor → Observer	New Observer subscription (single payment, 6-week term)	Guides member into Discord; assigns Observer role (coaching access)	“Your plan — week 1 of 6”
Observer → week 5	Nothing; plugin computes week from subscription start	Nothing	Campaign price and countdown on Navigator
Observer → Navigator	Observer ends; Navigator subscription starts	Switches role to Navigator	“Your plan” on Navigator
Observer → Activator	Observer ends; Activator subscription starts	Switches role to Activator (drops coaching)	“Your plan” on Activator; “Upgrade” on Navigator
Observer → lapsed	Observer ends; no new subscription	Lapsed role or Discord access removed	Lapsed table: tools noted, join buttons, campaign price if window open
Observer → early dropout	Observer cancelled before completion	Discord access removed	Public table (lifetime tools: open question)
Activator ↔ Navigator	Subscription switch	Switches role	“Your plan” moves
Lapsed → Navigator / Activator	New subscription	Assigns role	“Your plan”

Still to decide

Nothing in the flow presumes an answer to these — the dashed nodes stay dashed until Coach decides.

16.9

Early Observer dropout

Cancels before completing the six weeks: email list only, or some tool access?

16.10

Ex-Navigator / ex-Activator

After cancelling a paid tier: treated as lapsed Observer (tools-only) if they completed the training, or as a plain non-member?

16.4

Subscription edge states

On-hold, pending-cancel, failed payment — member or not, for the cards and for Discord?

16.5

Campaign window

Start at week 5 — confirm. Does the offer extend past trial end for lapsed Observers?
