

Here is the full updated **README.md**:

Agent Bench — FatTail Labs

A disciplined ensemble of specialized AI agents purpose-built for the development and long-term evolution of the FatTail Labs course platform.

This is not a loose collection of prompts. It is a structured development organization — each agent with deep domain mastery, strict invariants, and clear coordination protocols. Same callsigns and governance as the Fly-on-the-Wall bench; domains remapped to this product.

Governed by: `doctrine.md` and `first-principles-doctrine.md`

Pre-implementation process: `spec-create-review-workflow.md`

Core growth law: doctrine principle 10 — **the bench strengthens with every invocation**

Coach Content Law: doctrine §11 · DL-176 — nothing of Coach's is removed; research before questioning; block only invariant/law/system; opinions labeled opinions

Memory aids: `Architecture/flagged-ideas.md` · decision log · gate-reports

New agents: start from `agent-template.md`

Core Philosophy

- **Narrow & Deep Expertise** — every agent owns one domain completely and stays in it.
 - **Sacred Invariants** — non-negotiable rules that protect system integrity.
 - **Evidence-Based Culture** — no assumptions; only verified outputs and command evidence.
 - **Canonical Truth** — the approved Spec (`Specs/`) + decision log
(`Architecture/00-decision-log.md`) are the single source of truth.
 - **Product Boundary** — no code shared with MarketSwarm-Canonical; API only.
 - **Learner Capacity Over Dependency** — the stop-the-bleeding thesis governs product behavior and copy; process outcomes, never profit claims.
-

The Bench (Current Roster)

Authority & Orchestration

Callsign	Archetype	Core Domain
Coach	Product Architect & Final Authority	Vision, positioning, trade-offs, final approval (Ernie)
Juliet	Orchestrator & Vision Keeper	Spec decomposition, agent sequencing, execution plans, gate scheduling
India	Spec & Architecture Guardian	Spec/decision-log integrity, domain model, product boundary, invariants

Execution Specialists — Platform

Callsign	Archetype	Core Domain
Alpha	Backend Engineer	FastAPI service, MySQL schema/migrations, auth/SSO, entitlements, API surface
Charlie	Frontend Engineer	Next.js app: catalog, course detail, player, dashboard, admin UI
Echo	Human Interface & Interaction Designer	Apple HIG for Labs web, design tokens, control grammar, interactive design, visual review
Foxtrot	Infrastructure Engineer	MiniTwo/DudeTwo provisioning, launchd, MiniThree nginx, Cloudflare, deploys

Gemba	Lean Factory Worker	IKI Factory skills pipeline + conveyor (versioned registry, 24 h research, ranked Research cards, Spec→Build / Build→Deploy when ready, Hold sacred, complete Help Package for Deploy)
Mike	Security & Auth Engineer	Dual-issuer SSO, session JWTs, signed video URLs, secrets, WooCommerce webhooks
Sierra	Curriculum & AEO Specialist	Course copy formula, SEO/AEO layer (JSON-LD, titles, prerender), public catalog surface

Execution Specialists — Content Studio (P2)

Callsign	Archetype	Core Domain
Quebec	Content Production Operations	Production board, status lifecycle, backlog→seed, approval packages
Bravo	Content Research Specialist	Source packs, claims inventory, misconceptions, prior art
November	Instructional Designer	Learning outcomes, lesson plans, educational guidelines, resource design
Romeo	Script & Short-Form Writer	Course VO, coaching shorts, thematic shorts, YouTube long-form scripts
Papa	Video Producer	Renders, captions, YT + Labs distribution packages, placement proposals

Quality & Memory

Callsign	Archetype	Core Domain
----------	-----------	-------------

Delta	Gate Keeper	Quality gates, verification, evidence-based review
Kilo	Test & Quality Engineer	Test architecture, edge cases, regression suites
Lima	Technical Writer	Decision log entries, docs, interface contracts, institutional memory
Tango	Member Archetype Guardian	The trader-learner's experience: cognitive load, capacity-over-dependency, honest marketing
Hotel	Trading-Domain Guardian	Trading/options education accuracy; blocks false or reckless claims

Lineage Channels (philosophy & strategy)

Callsign	Archetype	Core Domain
Victor	Taleb Doctrine Channel	Antifragility, skin in the game, via negativa, epistemic humility
Whiskey	Spitznagel Strategy Channel	Capital preservation as strategy, tail hedges, safe-haven process
Yankee	Mandelbrot Lineage Channel	Fat tails, wild randomness, discontinuity vs mild Gaussian stories

Not yet seated (activate when their phase arrives): **Golf** (cognitive systems — Ask Vexy integration, P3).

Coordination

- All flows through **Coach** or **Juliet** — no direct agent-to-agent communication.
- Day-to-day content factory operation is owned by **Quebec** (backlog claim, stage hand-offs, Production Board, approval-package assembly). Juliet remains project-level

orchestrator and seed-template owner.

- Work advances through **Delta gates**; reports live in the project folder's `gate-reports/`.
- Project folders under `agents/<project>/` hold `ORCHESTRATOR.md`, `seeds/`, and `gate-reports/` (see `agents/README.md`).
